

2010 Marie-Curie Çalışma Programı'nda Yer Alan IIF Bilgisi

Action	Call ID	Call Opens	Call Deadline
International Incoming Fellowships	FP7-PEOPLE-2010-IIF	17 March 2010	17 August 2010

CALL TITLE: MARIE CURIE INTERNATIONAL INCOMING FELLOWSHIPS (IIF)¹

Call identifier: *FP7-PEOPLE-2010-IIF*

Date of publication: 17 March 2010

Deadline: 17 August 2010 at 17.00.00, Brussels local time

Indicative budget: *EUR 28 million* of the 2010 budget. The final budget awarded to this call, following the evaluation of projects, may vary up to 10% of the total value of this call.

Topics called:

Action	Funding Schemes
<i>Marie Curie International Incoming Fellowships</i>	<i>Support for training and career development of researchers</i>

Eligibility conditions

- The general eligibility criteria are set out in Annex 2 of this work programme, and in the guide for applicants. Please note that the completeness criterion also includes that part B of the proposal shall be readable, accessible and printable.
- The application is made jointly by a researcher and a host organisation, as well as, where applicable, a return host organisation.
- The action addresses researchers who, at the time of the relevant deadline for submission of proposals, correspond to the definition of "*experienced researchers*" and comply with the "*mobility*" rule. They must demonstrate mobility from a "*third country*" to a Member State or Associated country.
- Applicant host organisations must be active in research. For the incoming phase, the host organisation must be located in a Member State or Associated country. For a possible return phase, the return host organisation must be located in an International Cooperation Partner Country (ICPC).
- Projects must be for a period of between 12 and 24 months. Where relevant, the return phase will be for an additional 12 months.

¹ Work Programme Page 36-37

– For further details concerning these conditions you must refer to the core text of the work programme.

Evaluation procedure:

- The evaluation criteria (including weights and thresholds) and sub-criteria together with the eligibility, selection and award criteria, for the different funding schemes are set out in annex 2 of this work programme.
- Proposal page limits: Applicants must ensure that proposals conform to the page limits and layout given in the Guide for Applicants, and in the proposal part B template available through the EPSS. The experts will be instructed to disregard any pages exceeding these limits.
- The minimum font size allowed is 11 points. The page size is A4, and all margins (top, bottom, left, right) should be at least 15 mm (not including any footers or headers).
- A single-stage submission and evaluation procedure will be used.
- Proposals will not be evaluated anonymously.
- Proposals may be evaluated remotely.
- The procedure for prioritising proposals with equal scores is described in annex 2 of this work programme.
- Proposals are allocated to one of 8 scientific panels²⁰. For each panel a ranked list is established. The distribution of the indicative budget of the call over the scientific disciplines will be proportional to the number of eligible proposals received in each panel. If the budget allocated to a panel exceeds the requirements of all proposals positively evaluated²¹ in that panel, the excess budget will be reallocated to the other panels based on the distribution as above. Equally, if the allocated funding to a panel is insufficient to fund the highest ranked proposal in that panel, the necessary budget will be transferred from the other panels based on the distribution as above, in order to ensure that the highest ranked proposal can be funded.

Indicative evaluation and contractual timetable:

- Evaluation results are estimated to be available within some 4 months after the relevant deadline for submission.
- Grant agreement signature: expected from within 6 months after the relevant deadline for submission.

Forms of grants and maximum reimbursement rates: The forms of grants and maximum reimbursement rates which will be offered are specified in Annex 3 of this work programme.

MARIE CURIE ACTION: INTERNATIONAL INCOMING FELLOWSHIPS (IIF)²

Call Reference FP7-PEOPLE-2010-IIF

Introduction and objective of the action

This action aims to reinforce the scientific excellence of the Member States and the Associated countries through knowledge sharing with incoming top-class researchers active in a *third country* to work on research projects in Europe, with the view to developing mutually beneficial research co-operation between Europe and a *third country*. It aims to encourage these researchers to plan their period of international mobility within the framework of a coherent professional project and thus enhances the possibility of future collaborative research links with European researchers and organisations active in research in their future research career. If before the incoming phase the researcher was active in one of the International Cooperation Partner Countries (see Annex 1), the possibility is provided to assist the researcher to return to this country, thus contributing to the establishment of sustainable cooperation between these countries and European organisations.

Technical content/scope

Projects and participants: The action provides financial support to individual research projects presented by the incoming *experienced researchers* in liaison with a legal entity ('host organisation') in a Member State or an Associated country, as well as possibly a 'return host organisation' if the researcher was active in an International Cooperation Partner Country (see list of countries in Annex 1) before the incoming phase. The research topic will be freely chosen by the researcher in collaboration with the host organisation. The researchers shall be selected by the Commission on the basis of a proposal submitted in liaison with a host organisation in a Member State or Associated country.

Incoming Phase:

The grant agreement will be concluded with the host organisations of the Member States or the Associated countries for a total duration of between one and two years.

Possible Return Phase for researchers from International Cooperation Partnership Countries (ICPC):

For a possible return phase to an ICPC, a grant agreement will be issued for the duration of one year with the return host organisation, which will commit itself to ensure an effective return of the researcher. The grant is to be used as a contribution to scientific costs relating to the researcher's project at the return host.

The ranking list(s) for IIF proposals will be drawn up solely on the evaluation scoring of the incoming phase. The proposal will include a description of the return phase in an identified return host organisation; however selection for the return phase will depend on that of the incoming phase, which is considered to demonstrate the necessary quality of the researcher. During the evaluation, the evaluators will be asked to provide comments for the negotiation of the grant agreements with the return host, which will be taken into account by the Commission for the finalisation of the grant agreement.

² Work Programme page 22-23

The return phase will normally commence not later than 6 months after the termination of the incoming phase.

Eligible researchers: Researchers shall be considered eligible under this action if, at the time of the relevant deadline for submission of proposals, they fulfil the requirements for being qualified as *experienced researchers*. It is however expected that the researchers will typically have a more senior profile in terms of experience.

Rules of mobility and nationality applicable to eligible researchers: Applicants can be of any nationality. They must demonstrate mobility from a *third country* to a Member State or Associated country, and must comply with the rule for *mobility* at the deadline for submission of proposals. The benefit of the proposed mobility will also be assessed during evaluation in terms of benefit for the ERA.

Community Contribution, Rates and Evaluation Criteria: The Community rates are those for the funding scheme Support for Training and Career Development of Researchers, as set out in Annex 3 of this work programme. The evaluation, selection and award criteria are set out in Annex 2.

Expected impact of the action

Projects under this action will add to the research excellence in both the public and private sectors in Member States and Associated countries, due to the sharing and application of new knowledge transferred and developed by highly qualified researchers embedded in the European research effort. At the same time the projects will constitute nuclei for future research relations at international level, which will be beneficial in the context of the development of the European knowledge-based economy and society.
